

IT WORKSHOP ON
BLOCKCHAIN - THE TECHNOLOGY OF FUTURE
22 - 23 MARCH 2019

The Institute organised IT workshop on 22nd and 23rd March, 2019. The theme of the workshop was blockchain technology and it was attended by the students of MCA (DD). The objective of the workshop was to empower the students so that they are able to meet the challenges posed by day-to-day emerging technologies, and they have an edge over their counterparts when they go in for placements. The trainer for the event was Ms. Aditi Agarwal, Brain Mentors Pvt Ltd. Brain Mentors Pvt. Ltd. is basically into corporate trainings on emergent technologies.

On the first day the students were introduced to the concepts of Block chain. A blockchain, is a growing list of records, called blocks, which are linked using cryptography. By design, a blockchain is resistant to modification of the data. The workshop had a smooth flow and it covered the concepts from the fundamentals to advanced level. Various terminologies used in Block chain were discussed. The students were enlightened about crypto currency, its application and Genesis block.

The second day started with the theoretical concepts and then gradually shifted on to the programming part. The students were given hands-on practice on adding a block and generating different hash keys for the same data. The workshop was very interactive and the questions asked by students were answered well.
