

**WORKSHOP ON
ANDROID APPLICATION DEVELOPMENT
16th to 24th JULY 2018**

GIBS organized workshop for MCA (Dual Degree) programme from 16th to 24th July 2018. The theme of the workshop was “Android Application Development”. The objectives to organize the Android Application Development Workshop was that the mobile landscape is rapidly evolving, so are the mobile applications. New OS versions are being released within months and developers are trying to keep up with the pace of this change by bringing new applications to the market within weeks. Hence, the workshop aimed at bringing the fresh requirements of the industry to the students. The training was conducted by the expert trainers of VMDD Technologies, Delhi.

The training session started with basics of Android, its architecture, its anatomy, the Android Project Structure, working on Android support within Eclipse, User Interfaces, UI Design and Activity Lifecycle, Dalvik Virtual Machine, Android API Levels, Intents and Intents Filter, Alert Dialogs and Toast, File I/O, Reading and updating Contacts, Android Debug Bridge(adb) tool, etc. After learning all these basics, the students were able to develop their own Mobile Applications in different area.

Students developed mobile applications at the end of training, presented and submitted the Hardcopy of their projects. VMDD Technologies also conducted an online evaluation test on Android in which three students of MCA DD 6 Semester; Pushpender Rana, Shreya Bhupal Sharma and Shrishti Bhupal Sharma got special appreciation certificates.

The students were highly enthralled and inspired by Ms Ankita Pabbi. Dr. B.S Hothi, Director, GIBS ended the session with Vote of Thanks.
