

# ELS ON ENVIRONMENTAL ISSUES & CHALLENGES- INDIAN & GLOBAL PERSPECTIVE 27<sup>th</sup> DECEMBER 2022

GIBS organized a lecture as a part of Eminent Lecture Series titled ‘Environmental Issues & Challenges-Indian & Global perspective’ on 27<sup>th</sup> December, 2022. The major objective of this series was to generate awareness among students with respect to Environmental issues in which the whole world is captured. The workshop was conducted by Dr. Meena Jha, Environmentalist & Public Speaker. She has worked across varied domains including Environment, Water Management, Infrastructure, Social Development etc

In her session, she discussed about the important role that environment plays in the sustainability of life on Earth. All living things depend on the planet's resources to survive. Human being continues to pollute, over-use of these resources. The adverse effect is increasing due to pollution of land, water and air.

Thus it is a challenge for the youth of today to be more considerate towards our environmental issues, degradation and resource depletion etc. She advised the students to ake pledge to save our planet.

Further continuing her discussion she discussed many environmental challenges in front of young students like Greenhouse gas emissions, Water conservation, Global warming, Solid

waste management and Sustainable development. The session was very interactive wherein students' response was overwhelming and they also pledged to protect our environment.

Towards the end, Prof. (Dr.) Vinay Matri, Head Administration, GIBS presents memento to our esteemed chief guest Dr. Meena Jha. Ms. Shipra bhutani uppal bestow a vote of thanks to the guest speaker and encouraged students to take an oath to protect our environment.
