

IIC WORKSHOP
INNOVATION IN LEGAL EDUCATION:
PREPARING FUTURE LAWYERS
24TH AUGUST 2026 (MONDAY)

Gitarattan International Business School (GIBS), under the aegis of the Institution's Innovation and Entrepreneurship Cell (IIC), organized session on the theme “Innovation in Legal Education: Preparing Future Lawyers” was organized for law students, with the objective of examining the changing landscape of legal education and preparing future legal professionals for the demands of a rapidly evolving profession. A total of 41 students actively participated in the event. In the contemporary legal environment, traditional legal knowledge alone is no longer sufficient for professional success. The session aimed to provide students with practical exposure to innovative legal pedagogy, technology-enabled learning, experiential education, and practice-oriented skill development.

The distinguished resource person and Innovation Ambassador of GIBS, Dr. Nidhi Sharma, Associate Professor, GIBS shared valuable insights into the changing nature of the legal profession and emphasized the need for law students to develop professional competencies beyond conventional classroom learning. The session focused on emerging teaching methodologies, artificial intelligence and legal technology, practical legal skills, critical thinking, ethical reasoning, and interdisciplinary approaches to legal problem-solving.

The session emphasized the widening gap between conventional law-school education and the practical expectations of the legal profession. Participants were encouraged to understand how legal education can be strengthened through curriculum innovation, clinical legal education, case-based learning, simulations, moot court exercises, problem-solving activities, and experiential learning. Dr. Nidhi Sharma also discussed how technology can support legal research, documentation, analysis, and professional decision-making while maintaining the ethical responsibilities expected from future lawyers.

During the interactive session, the participating students actively engaged in discussions and explored various challenges and opportunities associated with the future of legal education. Practical examples and case-based discussions enabled participants to understand the growing impact of artificial intelligence and legal-technology tools on the legal profession. The session encouraged students to analyse legal problems from multiple perspectives and develop innovative solutions by integrating legal knowledge with technology, management, ethics, and other interdisciplinary approaches. Dr. Nidhi Sharma addressed the queries with practical insights and relevant examples, enabling students to connect theoretical legal education with real-world professional requirements.
